Codeforces: [Sliced Omelette](#) (Specialist) | LeetCode: [SlicedOmelette](#) (Knight)

EDUCATION

IIIT Naya Raipur

Aug. 2023 – May 2027

B.Tech in Electronics and Communication Engineering

CGPA: 7.85 / 10

- Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming (C++/Java), Operating Systems, DBMS (transactions & isolation levels), Computer Networks (HTTP/HTTPS, TLS).

EXPERIENCE

Mahyco Grow

Jan. 2026 – Mar. 2026

Software Development Engineering Intern

Remote

- Owned a production **FastAPI** backend end-to-end: API design, **JWT/RBAC**, asynchronous **MongoDB** (Motor) persistence, deployment and monitoring.
- Designed memory-bounded APIs for gigapixel GeoTIFF/JPG uploads; tile-based rasterio processing cut analysis from **hours to under 5 minutes**.
- Raised detection precision **40%** through sliding-window inference and global non-maximum suppression, backed by profiling, debugging and regression tests.
- Kept YOLOv8 localisation and a 3-class classifier behind clean service boundaries from requirements through production deployment.

Shipd by Datacurve (YC-backed)

Feb. 2026 – Present

Machine Learning Analyst (Freelance)

Remote

- Completed **15+ accepted ML benchmark tasks** in Python across image, text and tabular datasets; prepared data, compared experiments and produced validated submissions.
- Built an image-processing and geometry solver that identified objects and shadows, rejected inconsistent signals and scored **0.883** without external APIs or pretrained models.
- Debugged memory, file-path, dependency and output-format failures; added checks for schemas, missing values, row counts, reproducibility and edge cases.

PROJECTS

PrithviNet — Environmental Monitoring & Simulation Platform

[Live Demo](#) | [GitHub](#)

- Built a React, Express and MongoDB platform for citizens, industries, regional officers and admins, enforcing **JWT/RBAC** across reports, complaints, notices and dashboards.
- Integrated OpenAQ, Open-Meteo and Google AQI feeds; automated station sync and compliance scoring with scheduled jobs and service fallbacks.
- Implemented non-blocking pollution simulations with persisted job status; visualized spill propagation and WQI changes on Mapbox/OSM water segments.

Sentinel — YouTube Analytics & Processing Platform

[GitHub](#)

- Built a Next.js/TypeScript platform that ingests YouTube metadata, transcripts and comments into MongoDB and visualizes sentiment, engagement and creator-level insights.
- Added batched sentiment processing, MongoDB bulk writes and 7-day result caching, with bounded polling and retries for incomplete analyses and transcript failures.

NeuroLink — Dementia Support App (National Hackathon Winner — IIIT Naya Raipur)

[GitHub](#)

- Built a React Native/Expo app with biometric sign-in, natural-language reminders, SOS calling and live location sharing configured for 10-second/10-metre updates.
- Integrated Python services for a contextual chatbot, memory questions, flashcards and server-side face matching that links recognized people to journal entries.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript, SQL

Frameworks & APIs: FastAPI, Flask, Node.js, Express, React, Next.js, React Native/Expo, REST APIs

Databases & Cloud: MongoDB, MySQL, Redis, AWS (S3, Lambda), Vercel

Tools & Concepts: Git, JWT, OAuth 2.0, RBAC, asynchronous APIs, background jobs, testing, debugging

ML / LLM: NumPy, pandas, OpenCV, rasterio, YOLOv8, RAG, LangChain, LangGraph, LLM API integration

ACHIEVEMENTS

- ICPC India 2024** — All India Rank **509 / 1,200+** teams; 3rd place at IIIT Naya Raipur regionals.
- Flipkart GRiD 8.0** — Semi-finalist in India's largest national engineering challenge (2026).
- 3× National Hackathon Winner** — Education for AI (Thinkplus/SkillU) ([Cert](#)); CodeUtsava 9.0 at NIT Raipur ([Cert](#)); Hack-a-Sol 2025 at IIIT NR ([Cert](#)).
- NPTEL Deep Learning** — IIT-run certification with proctored exam ([Cert](#)).
